

Visit ADARA at the Edgecore Networks Booth #B21

ADARA will be featured in the Edgecore Networks Booth #B21

ADARA and Edgecore Networks believes the rising adoption of public, private and hybrid cloud infrastructures, and the requirement to integrate legacy infrastructures, has resulted in a marked shortage of IT talent with the required combined cloud and networking expertise, and a critical need for the automation of cloud operations.

Edgecore and ADARA's combined solution to address this challenge comprises:

- ADARA CloudFabric Cloud Management Platform, Sky SDN Controller and ADARA Path Computation Engine; and
- Edgecore open network switches as the leaf and spine data center fabric.

Please email sales@ADARAnetworks.com for a private product demonstration or more information.

About OCP US Summit 2017

The 2017 OCP US Summit brings together key decision makers, executives, engineers, developers, suppliers and more under one roof to help grow, drive and support the open hardware ecosystem in near and around the data center and beyond.

The OCP Summit is a great way to network and meet other people and companies with the same interest in changing the data center ecosystem through the power of open source. Find out how you can **Consume** OCP gear, **Collaborate** with the OCP Community and **Contribute** to the OCP ecosystem.
